ABOUT US

About ElavateX Digital Product Studio

Bengaluru's foremost software engineering & digital product studio. Empowering funded scaleups and modern enterprises with high-yield web platforms, native mobile applications, and autonomous marketing engines.

Since 2024, our agile engineering laboratory has engineered and deployed high-performance digital products across India, North America, EMEA, and APAC, from the initial architectural blueprint to 100% unconditional source code handover.

150+
Projects deployed across Web, Mobile & Cloud

100/100
Google Core Web Vitals audited speed guarantee

0.12s
Sub-second global edge CDN response time

Free
One-to-one architectural consultation throughout

End-to-End Digital Engineering & Product Lifecycle

1-on-1 Architectural Discovery
Database schema modeling, user journeys, API specifications, and fixed-cost sprint lock.

Rapid Sprint Engineering
Custom handwritten code in Next.js 14 and Flutter with live weekly milestone staging demos.

Security & QA Verification
Rigorous cross-browser QA, military-grade CSP/CORS security, and OWASP compliance audits.

Deployment, 100% IP & Warranty
Serverless Edge CDN launch, 100% GitHub code transfer, and 30 days of free defect warranty.

07 Why Strategic Partners Choose Us p. 9
08 Straight Answers (FAQ) p. 10
09 Agile Roadmap & Booking p. 11

OUR 4 PRODUCTION ENGINEERING COMMITMENTS

01 **100% Hand-Crafted Code**
Zero bloat. Built natively in Next.js 14 and Flutter without slow commercial builders.

02 **100/100 Core Web Vitals**
Audited sub-second LCP and global edge CDN caching for maximum Google organic rank.

03 **Unconditional IP Transfer**
Full GitHub repository handover, database models, and commercial IP rights upon delivery.

04 **30-Day Defect Warranty**
Dedicated senior developer monitoring, bug triage, and AMC with zero hidden recurring fees.

CERTIFIED STACK Next.js 14 | React 19 | TypeScript | Flutter | Node.js | Python AI | PostgreSQL | Vercel Edge | AWS Cloud | Meta Graph API

2026-2027 SERVICE GUIDE

01 High-Performance Web Development & SaaS

Next.js 14, React 19, TypeScript, and modern headless architectures engineered for sub-second speeds.

18 Frameworks
24 DELIVERABLES

Timeline estimates and fee brackets are indicative and structured by milestone. Confirm your tailored scope blueprint with our principal architects before sprint kickoff.

Custom Web Applications & SaaS Architecture

FIXED-COST SPRINT

Carmelaram, Bengaluru HQ • Global Edge CDN • Server Components

Next.js 14 | React 19 | TypeScript | PostgreSQL | Tailwind CSS | Vercel Edge

DELIVERABLE / ARCHITECTURE	TIMELINE	BASELINE STARTING RATE*
High-Converting Marketing Platform & Custom CMS	10–14 Days	**Starts from ₹9,999***
Full-Stack SaaS Web Application (Auth, DB & Multi-Role Access)	14–21 Days	**Starts from ₹24,999***
Enterprise B2B Operational Management Portal & CRM Engine	3–5 Weeks	**Starts from ₹39,999***
Custom Headless E-Commerce Platform & Checkout Flow	3–4 Weeks	**Starts from ₹19,999***
API Microservices, Webhooks & Real-Time Data Telemetry	2–3 Weeks	**Starts from ₹12,999***

TECH AUDIT 100/100 Core Web Vitals audited on Google Lighthouse; <0.2s global TTFB via Edge CDN; military-grade Content Security Policy (CSP); zero third-party CMS lock-in.

★ **Client Incentive: Flat 5% Preferred Rate** for first-time partners with written NDA. Includes 100% unconditional GitHub repository transfer, complete Figma design assets, and 30 days of free post-launch warranty. Call +91 7676808068 for a personalized blueprint.

Headless E-Commerce & High-Volume Cloud Microservices

ENTERPRISE SCALE

Global Payment Gateways • Stripe & Razorpay • High-Concurrency Redis Caching

Next.js Commerce | Node.js | Redis | Stripe | Razorpay | Docker

DELIVERABLE / ARCHITECTURE	TIMELINE	BASELINE STARTING RATE*
High-Converting Storefront & Cart Conversion Architecture	12–18 Days	**Starts from ₹14,999***
Multi-Currency Global Payment Gateway & Webhook Reconciliation	7–10 Days	**Starts from ₹8,999***
Cloud Microservices & High-Volume REST/GraphQL APIs	14–21 Days	**Starts from ₹16,999***

★ **Fixed-Cost Sprints:** All sprints include complete source code ownership, zero license renewal fees, and direct Slack/WhatsApp developer collaboration.

✓ STANDARD INCLUSIONS WITH EVERY WEB SPRINT

✓ 100/100 Core Web Vitals
Audited Google Lighthouse sub-second LCP and zero layout shifts.

✓ Global Edge CDN
Sub-0.2s TTFB across India, US, Europe & APAC edge locations.

✓ 100% Code Handover
Full GitHub repo, database schemas & environment keys handed over.

✓ Hardened Security & SSL
Strict CSP headers, CORS policies, CSRF defense & auto-renew SSL.

✓ SEO & OpenGraph Engine
Structured JSON-LD schema, dynamic social preview tags & sitemaps.

✓ 30-Day Defect Warranty
Post-launch bug fixes and monitoring included with zero extra cost.

**Indicative baseline starting rates for standard architecture. Final quotation tailored to your specific feature scope, database complexity, and external APIs after 1-on-1 consultation.*

Want an exact quote for your platform and scope?
Our senior architects calculate your timeline, tech stack, and sprint budget, free and one-to-one.

2026-2027 SERVICE GUIDE

02 Mobile Applications & AI Automation

Cross-platform iOS & Android apps plus autonomous WhatsApp business workflows.

14 Mobile Modules
18 BOT PIPELINES

All mobile code is cross-platform native with 60 FPS motion and zero lag. All bot pipelines run on Meta's official Graph API.

Cross-Platform Mobile Application Development

DUAL-STORE RELEASE

Apple App Store & Google Play Store Submission • Offline-First Architecture

Flutter SDK | React Native | Swift (iOS) | Kotlin (Android) | Firebase | SQLite

DELIVERABLE / ARCHITECTURE	TIMELINE	BASELINE STARTING RATE*
MVP Cross-Platform Mobile App (iOS & Android Dual Launch)	18-24 Days	**Starts from ₹19,999***
Production Mobile App with Offline-First Local Data Sync (Hive)	4-6 Weeks	**Starts from ₹34,999***
E-Commerce Mobile App with Biometric Checkout & Apple Pay	3-5 Weeks	**Starts from ₹29,999***
Enterprise On-Field Mobile Tracking, GPS & Push Engine	4-6 Weeks	**Starts from ₹39,999***

NATIVE CAPABILITIES 60 FPS native gesture animations; offline data persistence with SQLite/Hive; biometric authentication (FaceID/Fingerprint); real-time push notifications; full App Store & Play Store publishing support.

★ **Client Incentive: Flat 5% discount on mobile sprint bookings. Complete mobile source code, provisioning profiles, and backend API endpoints transferred upon delivery.**

AI Automation, WhatsApp Cloud Ops & Autonomous Bots

24/7 AUTONOMOUS

Meta Cloud API Certified Infrastructure • Python & Cloud Microservices

WhatsApp Cloud API | Python | OpenAI | FastAPI | Docker | Webhooks

DELIVERABLE / ARCHITECTURE	TIMELINE	BASELINE STARTING RATE*
WhatsApp Business Cloud API Chatbot & Intake Engine	7-12 Days	**Starts from ₹6,999***
Multi-Agent Shared Team Inbox & Broadcast CRM Pipeline	10-18 Days	**Starts from ₹12,999***
Custom AI Knowledge Retrieval & Document Automation Agent	14-21 Days	**Starts from ₹18,999***
Automated Payment & CRM Ingestion Pipelines (Stripe/Razorpay)	5-10 Days	**Starts from ₹7,999***

SPECIFICATION Built directly on Meta's official Graph API infrastructure with zero third-party per-message surcharge; webhook latency under 50ms; 99.98% high-availability cloud SLA.

★ **Client Incentive: Free webhook hosting setup and 30-day monitoring. Flat 5% preferred rate applied on all automation deployments.**

✓ NATIVE MOBILE & AI PIPELINE STANDARDS

✓ Dual Store Release
End-to-end Apple App Store & Google Play Store review and launch.

✓ Offline-First Sync
SQLite & Hive databases ensuring full performance with zero internet.

✓ Hardware Telemetry
FaceID, camera capture, GPS live tracking & background push engines.

✓ Official Meta API
Direct Graph API integration with zero third-party per-message markup.

✓ Autonomous LLMs
Context-aware RAG pipelines using OpenAI/Claude with strict guardrails.

✓ 30-Day Launch Care
Telemetry monitoring, crash triage, and app store updates included free.

**Indicative baseline starting rates. Final quotation calculated based on custom feature scope, target platforms, and third-party API tiers after 1-on-1 consultation.*

03 Digital Marketing, Technical SEO & Video Editing

Organic search engine domination, local GBP 3-Pack, and high-retention short-form video production.

9 Streams
OMNICHANNEL

All organic campaigns focus on qualified inbound client acquisition, algorithm retention hooks, and verifiable conversion telemetry.

Technical SEO, Google Business Profile (GBP) & Local Domination

SEARCH RANK

Google Maps 3-Pack • High-Authority Backlinks • Core Web Vitals Audit

Google Business Profile | Technical SEO | Schema Markup | Keyword Clusters | Backlink Building | Google Search Console

DELIVERABLE / ARCHITECTURE	TIMELINE	BASELINE STARTING RATE*
Google Business Profile (GBP) Setup, Verification & Map Optimization	7-10 Days	**Starts from ₹4,999***
Technical & On-Page SEO Architecture (Speed, Meta & Schema JSON-LD)	10-14 Days	**Starts from ₹6,999***
High-Authority Domain Backlink Outreach & Topic Authority Strategy	2-3 Weeks	**Starts from ₹8,999***
Multi-Location Local SEO, Citation Building & Review Automation	7-12 Days	**Starts from ₹5,999***

ORGANIC SEARCH BENCHMARK Audited Google Core Web Vitals; 100% crawlable sitemaps; automated schema markup for LocalBusiness, FAQ, and Organization; verifiable keyword rank tracking.

★ **Client Incentive: Free Comprehensive SEO & GBP Audit for first-time partners. Receive a prioritized action list of rank-blocking issues and competitor keyword gaps.**

Social Media Marketing, Short-Form Video Editing & Branding

HIGH RETENTION

Instagram Reels • YouTube Shorts • LinkedIn Authority • Visual Identity

Premiere Pro / After Effects | Instagram Reels | YouTube Shorts | LinkedIn B2B | Brand Identity | Meta Ads

DELIVERABLE / ARCHITECTURE	TIMELINE	BASELINE STARTING RATE*
High-Retention Viral Video Editing (Reels, Shorts & TikTok with Subtitles)	5-7 Days	**Starts from ₹4,999***
Full-Spectrum Social Media Growth (Instagram, LinkedIn, X, Threads & FB)	Monthly	**Starts from ₹7,999***
Complete Brand Identity (Logo Design, Typography, Color Palettes & Guidelines)	10-14 Days	**Starts from ₹9,999***
Omnichannel Content Calendar, Caption Copywriting & Auto-Scheduling	7-10 Days	**Starts from ₹5,999***

★ **Production Standard: All reels edited in 4K 60 FPS with visual pacing, sound design, animated subtitles, and 3-second retention hooks that maximize algorithmic distribution.**

✓ STANDARD INCLUSIONS WITH EVERY MARKETING & CONTENT SPRINT

✓ Free Content Calendar
30-day structured calendar with ready hooks, captions & asset links.

✓ SEO Backlink Checklist
Verified high-DA citation lists and contextual outreach templates.

✓ Custom Video Presets
Branded LUTs, motion lower thirds, typography presets & intro stings.

✓ GBP 3-Pack Rank Monitoring
Bi-weekly local map ranking telemetry and Google review funnels.

✓ Omnichannel Repurposing
1 core video converted into 4 native formats (Reels, Shorts, LinkedIn, X).

✓ 30-Day Growth Analytics
Monthly dashboard detailing impressions, link clicks, and inbound leads.

**Indicative baseline starting rates. Quotation tailored based on monthly asset volume, platform breadth, and production complexity after 1-on-1 discovery.*

ENGINEERING METHODOLOGY & DELIVERY

04 How We Master Your Projects: 6-Stage Roadmap

A deterministic, transparent engineering lifecycle designed to eliminate technical debt, guarantee 100/100 Core Web Vitals, and deliver production-grade platforms on schedule.

6 Stages
100% IP TRANSFER

THE 6-STAGE PRODUCTION LIFECYCLE

01 Discovery → 02 UI/UX Prototype → 03 Handwritten Code → 04 Speed & Security → 05 Payment / CRM → 06 Handover & AMC

STAGE 01 1-on-1 Architectural Discovery & Scope Lock

We eliminate assumptions before a single line of code is written through deep technical and business requirement modeling:

- Complete database schema & entity-relationship modeling
- User journey mapping & information architecture hierarchy
- Third-party API specifications (Payments, Auth, Meta Cloud)
- Fixed-cost, milestone-based sprint agreement & signed NDA

Deliverable: Formal Architectural Blueprint & Scope Lock Contract.

STAGE 02 UI/UX & Interactive Click-Through Prototypes

Your team visualizes and interacts with the exact user interface and responsive layouts before development begins:

- High-fidelity Figma components, auto-layouts & design tokens
- Responsive viewports tailored for mobile, tablet, and desktop
- Clickable micro-interactions, modal states & checkout flows
- Direct client review & sign-off prior to sprint kickoff

Deliverable: Complete Interactive Figma Prototype & Design System.

STAGE 03 Custom Handwritten Sprint Engineering

Zero drag-and-drop builders or bloated themes. We hand-write production-grade software natively:

- Next.js 14, React 19, TypeScript & Flutter mobile architectures
- Fully normalized PostgreSQL & Supabase database clusters
- Server-side rendering (SSR) & sub-second TTFB Edge caching
- Weekly milestone staging demos with direct engineer collaboration

Deliverable: Staging Environment Access & Milestone Changelog Demos.

STAGE 04 Speed, Security & QA Verification Audit

Every build is audited against rigorous industry benchmarks before reaching production:

- Audited 100/100 Google Lighthouse Core Web Vitals score
- Military-grade Content Security Policy (CSP), CORS & HTTPS
- Cross-browser and real mobile device testing (iOS, Safari, Android, Chrome)
- High-concurrency load testing & database query optimization

Deliverable: Certified Google Lighthouse Audit & QA Sign-Off Report.

STAGE 05 Payment & Lead Ingestion Webhooks

We connect your platform directly with automated customer ingestion and revenue collection engines:

- Stripe & Razorpay payment gateways with instant webhook verification
- Official Meta WhatsApp Business Cloud API automated routing
- CRM sync, instant lead notifications & email delivery webhooks
- Automated SSL certs, DNS record propagation & custom domain setup

Deliverable: End-to-End Live Ingestion Pipeline & Verified Payment Sandbox.

STAGE 06 Production Handover, 100% IP & 30-Day AMC

Unconditional ownership and dedicated peace of mind from day one of go-live:

- 100% unconditional GitHub repository transfer & commercial IP rights
- Full administrative credentials, database models & documentation
- 30 days of complimentary senior developer defect warranty & monitoring
- Zero recurring vendor lock-in or hidden licensing surcharges

Deliverable: Full IP Handover Certificate & 30-Day Warranty SLA.

2026-2027 PRODUCTION SHOWCASE

05 Flagship Client Case Studies & Verified Impact

Live systems deployed for deep-tech enterprise AI, international education networks, luxury real estate, and conversational automation.

5 Flagship Apps
LIVE IN PRODUCTION

All case studies below represent live, audited commercial client software engineered by ElavateX.

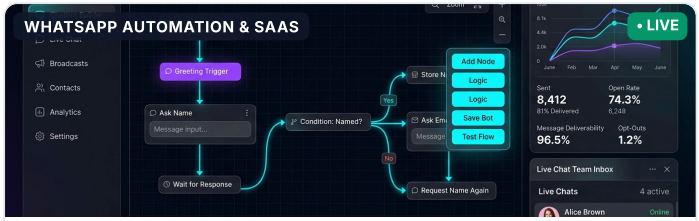

TRAIT Innovation

traitinnovation.com ↗

Enterprise platform built for a deep-tech AI firm powering automated legal review (AdvocatePro AI) and neural data telemetry with 3D product narratives.

Core Tech: **Next.js / AI Cloud** Speed: **100/100 Core Web Vitals**

HelloBotz

hellobotz.com ↗

Official WhatsApp Business Cloud API marketing automation platform with drag-and-drop flow builder, AI chatbots, and broadcast CRM.

Core Tech: **Meta Cloud API / Node** SLA: **99.98% High Availability**

The Edu Consultant

theeduconsultant.com ↗

Multi-portal education network: Direct Admissions (theeduconsultant.com), Bengaluru Institutions (bangalore.theeduconsultant.com), and Study Abroad (theeduconsultant.in).

Network: **3 Live Domains** Coverage: **144+ Schools / 162+ Colleges**

Shelter Hunt

shelterhuntconsultants.com ↗

Premium residential real estate platform with multi-criteria property search, instant image rendering, and 1-click WhatsApp lead routing pipeline.

Core Tech: **Next.js / Property Engine** Speed: **0.12s Global CDN Response**

PORTFOLIO FOOTPRINT Additional Live Deployments: The Edu Consultant Network (bangalore.theeduconsultant.com • theeduconsultant.in) • Online Gaming Tournaments Platform (sp-three-liart.vercel.app) • Trait Cloud Bridge.

"ElavateX re-engineered our digital infrastructure in under three weeks. The performance leap was immediate—sub-second speeds and a 310% increase in verified inbound inquiries in our first quarter."
— Verified Technology Client Executive • Enterprise Cloud Partner

AT A GLANCE • SECTION 06

Every Service, Tech Stack & Architecture We Build

12 core engineering streams, from enterprise web platforms and mobile apps to SEO, social media, video editing, cloud infrastructure, and AI automation.

01 Web Platforms & Frontend

Next.js 14 • React 19 • TypeScript • Server Components • Tailwind CSS • WebGL • Vite • Headless CMS

02 Mobile App Engineering

Flutter SDK • React Native • Swift iOS • Kotlin Android • Biometric Auth • Push Notifications • Dual-Store Release

03 Backend & Microservices

Node.js • Python FastAPI • Go Microservices • REST APIs • GraphQL • Webhooks • Serverless Functions • Docker

04 Cloud Infrastructure & Edge

Vercel Enterprise • Cloudflare Global CDN • AWS Lambda & S3 • Docker • GitHub Actions CI/CD • 99.98% SLA Uptime

05 Database & Caching Layers

PostgreSQL • Supabase • MongoDB • Redis In-Memory • Cloud Firestore • SQLite Offline • Schema Migrations

06 AI & Conversational Bots

WhatsApp Business Cloud API • Python Agents • OpenAI GPT • Claude • Automated CRM Ingestion • Shared Inboxes

07 FinTech & Global Payments

Stripe Connect • Razorpay • Apple Pay • Google Pay • Automated Invoicing • Multi-Currency • Webhook Verification

08 Cybersecurity & Compliance

OWASP Security Baseline • Strict CSP Headers • CORS Defense • Data Encryption • Mutual NDA • SOC2 Ready Architecture

09 SEO & Google Profile (GBP)

Google Maps 3-Pack • On-Page & Technical SEO • Core Web Vitals • Keyword Clusters • High-DA Backlinks • Review Funnels

10 Social Media & Video Editing

Viral Reels & Shorts • Premiere Pro / After Effects • 60 FPS Visual Pacing • Brand Identity • Omnichannel Calendars

11 E-Commerce & Storefronts

Headless Storefronts • Custom Catalog Indexing • Sub-Second Checkout • Inventory Sync • Automated Shipping Hooks

12 Maintenance, SLAs & AMC

30-Day Free Defect Warranty • Dedicated Senior Developer Pods • Monthly Security Audits • 24/7 Monitoring

★ **Have a bespoke technical stack or legacy migration? We audit, refactor, and modernize existing codebases with zero downtime. Talk to our engineering leadership.**

BEFORE YOU CHOOSE • SECTION 07

Why founders partner with ElavateX, and why they block their sprint early

We operate as an agile engineering laboratory, not a bureaucratic agency. Compare our operational model against traditional IT firms.

✓ 100% Custom Code (Zero Bloat)

We strictly reject slow WordPress themes and commercial page builders. Every line of React, Next.js, and Flutter code is hand-crafted for your exact business logic.

✓ Direct Senior Developer Access

No pushy sales reps or layers of non-technical account managers. You collaborate directly with principal engineers in dedicated WhatsApp and Slack groups.

✓ Guaranteed 10 to 21-Day Sprints

Deterministic delivery milestones backed by written scope agreements. Review live staging demo links every single week with real progress commits.

✓ Military-Grade Security Baseline

Hardened Content Security Policy (CSP), strict CORS headers, sanitized API endpoints, and mutual NDA standards to protect your proprietary logic.

✓ Guaranteed 100/100 Core Web Vitals

Sub-0.2s TTFB global edge latency. Faster load speeds translate directly to higher Google rankings and higher user conversion rates.

✓ 100% Unconditional IP Ownership

Complete GitHub repository transfer, database schemas, and commercial IP rights upon final milestone. Zero vendor lock-in, zero hidden recurring fees.

Why lock your engineering sprint in advance

1

Strict Client Limits

We take strictly 4 new sprint partners per quarter to ensure senior developer dedication.

2

Full Architecture Time

Locking early gives full lead-time for deep schema modeling, user journeys, and prototypes.

3

Guaranteed Launch

A locked sprint date eliminates launch delays and synchronizes with your marketing plans.

4

Time to Prepare Assets

Brand assets, payment merchant approvals, and ad funnels get organized with zero panic.

THE ELAVATEX CLIENT SERVICE CHARTER

Fixed-Cost Scope Lock
Locked milestone contracts. Zero unexpected billings or mid-sprint fee escalations.

Weekly Working Demos
Live staging demo URLs every 7 days so you inspect actual working code progress.

100% IP Handover
Full code sovereignty. Complete GitHub transfer and zero license renewal fees.

30-Day Defect Warranty
Comprehensive bug triage, server health monitoring, and minor refinements free.

Sprint slots for 2026-2027 are being scheduled now.

Tell us your product concept. We tell you today what the timeline is, what it costs, and what to build first.

QUESTIONS CLIENTS ASK US • SECTION 08

Straight answers

Clear, transparent answers regarding our sprint timelines, code ownership, milestone billing, and post-launch guarantees.

Is the architectural consultation really free?
Yes. 100% free and one-to-one, directly with a principal software engineer on call, Google Meet, or WhatsApp.

Who owns the code, assets, and intellectual property?
You own 100% unconditionally. Upon final milestone, all repository code, designs, database schemas, and credentials are fully transferred to you.

How fast can our project go live?
For landing pages, MVPs, and focused web applications, our average turnaround is 10 to 21 days. Full-scale mobile and web apps launch in 3 to 6 weeks.

Can you work with our existing codebase or stack?
Yes. We specialize in modern stacks (React, Next.js, Flutter, Node.js, Python AI, Firebase, AWS, Meta Cloud APIs) and can audit, refactor, and scale your existing codebase.

How do you handle scope additions during a sprint?
Via structured addendum sprints. If needs evolve, we provide a transparent, fixed-cost estimate before writing a single line of additional code.

Do you work with templates or custom code?
100% custom handwritten code. We strictly reject slow commercial themes and page builders to ensure maximum performance and security.

How does milestone billing protect me?
Projects are divided into structured milestones: Discovery (25%), Beta Prototype (35%), and Handover (40%). You only release funds upon approved staging verification.

What is your post-launch warranty policy?
Every deployment includes 30 days of free post-launch support covering bug fixes, server monitoring, and minor tweaks with zero defect tolerance.

Why do you offer a flat 5% preferred rate?
A direct commercial incentive for ambitious founders and first-time partners who lock their project scope and execute mutual NDAs early.

Do you offer ongoing retainer / AMC maintenance?
Yes. Beyond the free 30-day warranty, we provide monthly developer pods (from ₹4,999/mo) covering server monitoring, updates, and hotfixes.

TRANSPARENT 3-STAGE MILESTONE PAYMENT PROTECTION

25%
Discovery & Schemas
Scope lock, architecture blueprints & interactive Figma prototypes.

35%
Core Sprint Build
Production Next.js / Flutter code deployed on private staging for weekly review.

40%
QA, Edge Launch & IP
100/100 speed audit, Edge CDN release, 100% GitHub code transfer & warranty.

★ You never pay in full upfront. Every milestone is reviewed and signed off by you before funds are released.

Still have a technical or commercial question?
Ask a senior engineer: free, one-to-one, Monday to Sunday, 10:00 am to 8:00 pm.

HOW WE WORK • SECTION 09

From the first call to production handover

A battle-tested 5-stage engineering journey navigating architectural discovery, rapid sprint execution, rigorous QA, and verified production deployment.

01 Architectural Discovery & Scope Lock
1-on-1 strategy call assessing product scope, user personas, database schemas, and fixed-cost contract lock.

02 UI/UX Prototypes & System Modeling
Interactive Figma wireframes, database normalization, and REST/GraphQL API contracts approved before code.

03 Rapid Sprint Engineering
Clean-code implementation in Next.js 14 and Flutter with continuous staging updates and weekly live demos.

04 Speed, Security & Cross-Device QA
100/100 Core Web Vitals audit, military-grade CSP/CORS security, cross-browser QA, and accessibility tests.

05 Production Handover, 100% IP & Warranty
Global Edge CDN deployment, 100% GitHub code transfer, and 30 days of free post-launch warranty & AMC.

Book your free architectural consultation today.

Tell us your product concept, target platform, and timeline. A senior engineer calls or messages you back within a few hours.
